

Quality \ Inspection

PTD not only recognizes the measurability of quality but its savings. The savings of producing parts right the first time, and on time. Quality itself is FREE.

The true COST of quality comes from the expense of doing things wrong. Some prefer the term "cost of poor quality" (COPQ). In short, any cost that would not have been expended, not only at our facility but at our customers as well.

The **Mitutoyo Crysta Apex V776** offers unmatched speed and accuracy. It can develop inspection program based on the CAD models used to manufacture the detail.

CMM Mitutoyo Crysta Apex V776
X, Y travel 27.55 x 27.55 inch
Z travel 23.6 inch
Rotary probe head Renishaw PH10MQ/ SP25

0 - 24" Height Gage

0- 36" Calipers

0 - 12" mics

Thread mics

Thread Gauges

Pin Gauges

Hardness Tester

Parallel Tool & Die has a QMS in place and is ISO9001:2009 \ AS9100D Compliant
